Juannicco Morquante Long

4802 Neta Drive, Killeen, Texas • +1 832-998-8756 • j.morquante@gmail.com

Lead Software Engineer

Experienced software engineer with a strong background in building and supporting enterprise applications and maintaining mobile applications. Skilled in developing user-friendly interfaces and collaborating with cross-functional teams.

WORK EXPERIENCE

SotaTek • 02/2017 - 08/2021
Full Stack Developer

- Played a key role in the buildout and support of new enterprise applications, ensuring they met business requirements and were scalable and maintainable.
- Maintained and supported iOS and Android mobile applications, ensuring they functioned correctly and were up-to-date with the latest technologies.
- Supported legacy codebase, identifying and fixing bugs, and implementing enhancements as required.
- Assisted with regression testing when needed, ensuring that new code did not introduce unintended issues.
- Fully tested all code before moving it to the QA stage, ensuring high quality and reliability.
- Developed quality, user-friendly UI views based on rough descriptions from Product Owners, delivering intuitive interfaces for end-users.
- Provided after-hours support on a rotating basis with the rest of the team, ensuring that critical issues were addressed promptly.

Stier Solutions • 07/2014 - 01/2017
IOS Developer

- Collaborated within a vertical team focused on specific mission-driven features and services, working closely with engineering managers, engineers, and QA to develop innovative solutions meeting market needs.
- Architected, designed, wrote, reviewed, and tested code collaboratively, with a focus on building and maintaining Identity Native SDK(s) for iOS.
- Ensured the performance, quality, and responsiveness of all Identity Native SDK for iOS, including building monitoring systems for reliability and overall health.
- Worked closely with product managers to translate product requirements into technical solutions, leveraging peers as multipliers for skills to create excellent products.

Lightspeed Voice · Remote
Web Developer · Full-time

- Worked on complex web development projects for internal products and services, utilizing React, Tailwind, Node.js.
- Developed and maintained custom frameworks to meet specific business requirements and enhance system performance.
- Utilized MongoDB for database management, ensuring data integrity and security.
- Collaborated with cross-functional teams to define and refine project requirements, ensuring alignment with business objectives.
- Leveraged expertise in jQuery, Bootstrap, and front-end UX development to create user-friendly interfaces.
- Contributed to the company's commitment to incredible customer service and high-touch partner engagement.
